1/ Production figures are made up of Census ginnings plus the City crop. Ginnings figures are total ginnings within the twelve months of the season, excluding ginnings of current crop the beginning of the season but including end-season ginnings of the next crop. 2/ Prior to 1914-15 the carry-over was as of August 31, whereas beginning with 1914-15 it has been as of August 1. 3/ Consumption figures do not include a small amount of cotton destroyed for which allowance is made in calculating end-season carry-over. 4/ Preliminary. Crop figure given for current season is approximate running bale equivalent of latest Government estimate in 500-lb bales plus city crop allowance.
